

ABOUT US

At SVX FUNDED, we believe that **trading is more than numbers — it's a profession, a skill, and for many, a way out.**

We exist for those traders who wake up every day ready to outthink the market, who study, backtest, fail, get up, and go again — **not because they have to, but because they're built for this.**

We are a **proprietary trading firm specialized in synthetic indices**, created to identify and empower talented traders from around the world, regardless of their background or financial capacity.

While most prop firms limit you with time pressure, strict styles, or complex rules — **we do the opposite.**

We give you freedom, flexibility, and a fair shot to prove yourself.

If you're a focused trader with discipline and edge, **we're here to put capital behind your skill.**

Our Mission

Our mission is to break the gap between talent and opportunity.

Too many great traders never reach their full potential because of capital limitations, inaccessible firms, or rules designed to exclude rather than reward.

We're here to change that.

At SVX FUNDED, we:

- Offer affordable, accessible challenges designed to test skill, not stress tolerance
- Fund traders who show consistency and risk control
- Reward performance quickly, with fast payouts and scaling opportunities
- Create a platform where freedom meets structure — no IP blocks, no deadlines, no judgment on your strategy

Whether you're trading from Lima, Lagos, Karachi or Chicago — if you've got what it takes, we're here to back you.

Our Vision

We envision a world where the most disciplined and committed traders control their destiny — not by luck or privilege, but by results.

We are building a global community of traders who are:

- Profitable
- Committed
- Free
- Constantly evolving

A place where a \$5K challenge can lead to a \$2M account, and one payout can change the trajectory of a family, a business, or a life.

We don't just want you to trade a funded account — we want you to become a funded trader for life.
